Startleyouw of the Tisses is no longer a candidate for one of the new Clerkships. Finding that no body had so little self-respect as to agree to vote for him he hunled off the track in diagust, and has recommenced his old work of throwing code at Republicans. So long as the story fellow was tickling himself with the silly notion that he atood a chance of being elected Clark, he refrained from his daily defamations. He is now making up for lost time.

this, and of this hastiard Democracy by which Polk, Pieres and Berchauan are sunstitued in their blows at your prospecify? Hare we not had Presidents enough to whom the Nigger is the role object in all this Union with Presidential care? Is it not about time to have a withte man—the representative of white men, a free man—the exponent of free-man's wants, at the head of this nation? We have home interest to be protected and fossered; an internal commerce to be built up; Tree Labor to be encouraged. Cubs and her niggers, creoks and priests; Contral America with her Catholicism, superstition and degradation; Democracy generally with its schemes for the spread and perpetuation of Slevery and Athelus, are of fittie moment compared with what the Northwest demands for herself. The price of wheat is of more consequence of the darkie's fiesce. The propagation of the best breeds of eattle and swine for the chambles is more to be considered then the rearing of colored women for forced but ignominious prostitution. We want a Presidential that the decision of the American will show the first opportunity to eate an election by plurality, and give the Speaker and yield all the schere of the darkie's fiesce. The propagation of the best breeds of eattle and swine for the chambles is more to be considered them the rearing of colored women for forced but ignominious prostitution. The time is at hand when much a man may, despite he reles of "Nigger Equality," and "amalgamation!" be called to dil the place abused if not diagraced by the Pennsylvania Federalist.

A Lame and impotent Conclusion. It is well known that the Dem cracy (co-called) had a majority of three in the Senate, and five in the House, in our late Legislatura. It is well known that with all this force they were unable to pass a single party measure. The Lecompton Charter was equested on the day of its appearance in the House. The stiff to elect Wm B. Fondey to an office which the people didn's want him to have, was ignomisionally turned out of doors. The swindling apportionment bill—the measure of all others which the Democrats were interested in driving through—was worried to the end of the longest mession ever held since the adopt on of the constitution, and then killed dead. Be glaring did the incapacity of the pre-slavery leaders become, that it is now seriously questioned whether Lincoln would not have been elected to the Senate if the joint convention had been postposed a the joint convention had been pustposed a comple of weeks. The citizens of Springferd and the host of carmal visitors who ware recent as one time and another during the sealon; were firmly impressed with the belief in the reason of the other days of the sealon; were firmly impressed with the belief that three Remublicans were completed in the Remublicans.

was ever actually paid according to the agreed meal.

Very similar was the case pursued by the late Superintendent with respect to the paper mean. facturers. Parties supplying the Government were commelled to employ certain agents of Washington to receive their paper, to whose they had to pay three and a hell per cost, commission. The Superintendent borrowed money largely from the paper contrastors as well as from the lithographers. For these losses, amounting in one instance to upward of twelve thousand and in another to right thousand dollars, no security we taken nor had the repayment ever been demanded. One of the leaders indeed testified that he did not expect to receive it back, and that it was in consideration of the service Mr. Seaman could render him on account of his position. In another case a formal agreement was made with a contractor by the Superintendent by which, in consideration of a nanual payment to the latter of seven thousand dollars, the former should have a contract for all the paper he could supply. The money was only not paid, decease of some subsequent disagreement.
